# IT Strategies for M&A, Divestment & Restructures

## Depend on expert advice and seamless IT services for managing change

During rapid expansion and restructuring, the outcomes of mergers and acquisitions, divestment and other major business changes are critically dependant on having the right strategy and IT delivery team.

## Trust the experts at Huon IT

Our specialist team at Huon IT have extensive experience working with organisations undergoing structural change. You can depend on us to custom design and provide cutting edge IT strategies and platforms that will ensure your transition will be **smooth**, **secure** and **efficient** now and for the future ongoing operations.

## A customised approach

As every corporate restructure is different, here are some of the 'shape to fit' services available in an advanced Huon IT change management process:

- Cloud requirement assessment
- IT infrastructure requirement assessment
- Solution design
- Stakeholder workshops
- Infrastructure and end user environment design
- Budget planning and reporting
- IT security review
- Compliance reporting
- Procurement needs
- Change management
- Staff training
- 3rd party liaisons (carriers, software vendors, building managers etc)
- Project management disciplines

*"Huon IT is a leader in outsourced IT services ... They care about their clients' needs. Their professionalism makes working with Huon IT an easy choice."*

Nick Kuys  
GM of Operations  
and Investor Relations  
DUET Group

## Cutting edge expertise, personalised service

At Huon IT, our team are highly experienced with advanced technological capabilities. They are also friendly, accessible and highly responsive to your unique needs and business outcomes.

And unlike many IT companies, we're more than happy to share our knowledge along the way. We train and empower your relevant team members throughout the process, and beyond.

Our fully resourced team of experts includes: **CIO and strategic advisors**, **project managers** and **a specialist range of skilled IT professionals** providing the perfect mix of business acumen with IT expertise.

## Huge gains without the pains

A key feature of our service is the ability to design and deploy advanced new platforms and systems with **zero downtime** to your day to day operations. From an off-site workshop build, testing and troubleshooting through to after hours installation, your whole transition with Huon IT will be smooth, straightforward and stress-free.

Read some of our success stories over the page.

*"We left work on Friday and when we came in on Monday, our entire IT system had been switched over. It was a totally seamless transition."*

Anton Clowes  
Vice President (former), M&A

## Some client success stories

Huon IT has implemented a number of highly successful projects for a range of organisations. Check out just a few of our outstanding IT transformations for restructuring clients:

**The Project:** Building a ground-up IT system for Freehills Patent Attorneys (FPA), and also safely migrating them away from their previous parent company.

*“Huon IT played a key role in setting up the technology to run our holdings group, QANTM, and transitioning FPA onto an independent IT environment. With their meticulous planning, technical expertise and focus on security, I knew we were in safe hands.”*

- Leon Allen, Managing Director | QANTM IP

**The Project:** Internalised management, previously held by Macquarie Group, required a complete build of Macquarie Airport's entire technology platform in both Sydney and London.

*“Huon IT's solution did everything we needed it to do. We have the support we need, reliable connectivity, instant international file sharing. Not only that, but they are always available, friendly, and approachable. It's a pleasure working with them.”*

- Anton Clowes, Vice President (former) | MAp

**The Project:** Built scalable infrastructure to support rapid expansion of 23 sites over the past 10 years.

*“I love the partnership focus we get from Huon IT. We're important to them as a real, long-term relationship. You don't always get that in the business world, and it feels good.”*

- Mark Broadhead, Chief Financial Officer | RSL LifeCare

**The Project:** Break from Macquarie Group requiring an independent operating environment while maintaining continuity with no interruption of services to investors.

*“We needed to completely separate from our old system while maintaining continuity so that our business could continue operating as usual, with no interruption of services to investors. Huon IT clearly understood our IT needs and implemented an appropriate solution.”*

- Nick Kuys, GM of Operations and Investor Relations | DUET Group

**The Project:** Extraction from Thomson Geer as a brand new start up firm, requiring new IT infrastructure.

*“The service we have received from the Huon staff has been nothing short of magnificent. Thanks for the great service and above all, thank you for providing us with such brilliant staff at a time when we were under a lot of pressure and stress with our move.”*

- Mindy Pawsey, Worksafe Compliance and Training Manager | IDP Lawyers
